
[eSearch plus: a new service of OHIM](#)

The Office for Harmonization in the Internal Market (OHIM) has recently set up a new service called eSearch plus. With this new tool you have the possibility to do an advanced search for Community trademarks and designs for better and tailored results. Setting up alerts using RSS is also an option, in case you want to be informed about changes in your search results. ESearch plus is available in English only, but according to OHIM the final version will also be available in Spanish, German, French and Italian.
