
[New WIPO Patent Information Tool for Innovators](#)

The World Intellectual Property Organization (WIPO) has expanded its suite of online services with an online platform providing free access to comprehensive, unbiased, and structured reports on many [patent](#) databases. [WIPO INSPIRE](#) (Index of Specialized Patent Information Reports) will help a range of stakeholders in searching the myriad of patent databases around the world.

WIPO INSPIRE offers a range of powerful but easy-to-use functionalities for both novice and expert patent information users in mind. They include:

- a comparison of features for up to four patent databases,
- an interactive world database coverage map, allowing users to determine, at a glance, which patent databases offer coverage of a specific jurisdiction.

WIPO INSPIRE is integrated with WIPO's [Patent Register Portal](#) and [eTISC](#), providing a seamless environment for users to get information about patent databases and patent registers and an opportunity to interact with patent information experts and discuss these tools.
