

[EPO has announced the beta version of new Espacenet](#)

The European Patent Office (EPO) has launched the beta version of Espacenet, its online patent search database containing more than 100 million patent documents.

The new version aims at enriching patent search experience with a more intuitive, extensible, dynamic, portable and accessible tool.

Users are invited to explore this beta version and are welcome to provide their feedback, if they face any issues or to suggest any improvements.

Access the new Espacenet [here](#).
