## [EPO Announces Finalists for the European Inventor Award 2019](#)

The 15 finalists nominated for the European Inventor Award 2019 have been announced! The award, now in its 14th year, celebrates the genius and creativity of inventors and inventor teams for their contributions to scientific and technological progress, their role in generating economic growth, and their impact on our daily lives.

The winners of the 2019 edition will be announced at a ceremony in Vienna on 20 June 2019. The award will be given in the five categories of "Industry", "Research", "Non-EPO countries", "SMEs" and "Lifetime achievement". In addition, the public will choose the winner of the "[Popular Prize](#)" from among the 15 finalists by voting online on the EPO's website in the run-up to the ceremony.

The inventions cover a range of fields including eco-packaging, rechargeable batteries, genetics, agricultural technology, video coding, cancer diagnosis, electron microscopy, advanced driver assistance systems and plastic recycling.
