
[The EUIPO launches its new IP Enforcement Portal](#)

This new interactive tool intends to be a bridge for secured communications between rights holders, EU enforcement authorities and the EU Commission, as well as other delegations located outside the EU. By integrated in one unique Portal the Enforcement Database, the Anti-Counterfeiting Intelligence Support Tool (statistics and data on counterfeit goods) and the Anti-Counterfeiting Rapid Intelligence System (database with all IP infringements experienced by EU companies), this initiative aims to ease and quicken enforcement matters by swiftly connecting all parties.

You can register and access this new tool [here](#).
