
[Next Application Deadline for the European Commission's IP Booster: 31 October 2019](#)

The European Commission's [IP Booster](#) is a free service to provide specialised, professional IP advice to European Universities and Public Research Organisations.

Are you:

- Generating high-quality research, and eager to improve its impact on the market?
- Trying to better address IP issues associated with commercialisation?
- Searching for experts who can help you develop a successful intellectual property strategy?

The IP Booster team can help you:

- Determine what type and what amount of IP protection you need for your project's intellectual assets, and whether you need to acquire rights to third party IPRs
- Design a patent landscape so that you can clearly identify which commercialisation pathways are best for your research
- Conduct a thorough due diligence assessing the quantity and quality of IP assets generated by your project and estimate their future value
- Prepare your project's patent, design and trademark applications
- Provide advice and support in negotiating technology transfer agreements

Next application deadline & eligibility criteria

To receive the IP Booster support, you need to apply via the service's [website](#). **The current call closes on 31 October 2019.** Find out more about the application process and the support services [here](#) and download an application form [here](#). Please also check the following eligibility criteria:

- The application must originate from a European University or Public Research Organisation
- The applicant's university or organisation must have a PIC (Participant Identification Code)
- You must not be able to secure similar IP services at national level

Should you have any questions, please contact: ipbooster@meta-group.com.
