
[Out Now: Dates for Study Visits to the European Patent Office in 2020](#)

Every year, the European Patent Academy arranges four study visits to the European Patent Office (in Munich or The Hague) for students from European universities and other interested people.

The events provide a general introduction to the EPO and the European patent system, with two of them focusing on specific issues such as biotechnology patents or computer-implemented inventions (depending on students' requirements).

Save the dates for the 2020 series now:
