
[WIPO Consultation on AI and IP](#)

The World Intellectual Property Organization (WIPO) has launched a public consultation process on artificial intelligence (AI) and IP policy. The goal is to develop a list of issues concerning the impact of artificial intelligence (AI) on intellectual property (IP) policy through an open process.

After the [event on IP and AI](#) held by WIPO on September 27, 2019, the organisation announced that they would commence an open process to develop a list of issues concerning the topic.

Interested parties are now officially invited to provide comments on any aspect of the IP system that is impacted by AI.
