
[IP4Teen - IP Basics for Teenagers](#)

IP4Teen is a project supported by the EUIPO, that seeks to raise awareness among European teenagers about the value of intellectual property as well as about the risks associated to piracy and the purchase of counterfeits.

To this end, the IP4Teen website makes available for free various online resources - including case studies, clicking games and interactive videos - aimed at sensitising teenagers to the issue of piracy and counterfeiting.

All contents focus on topics of particular interest to teenagers, such as fashion, social media or online video streaming and are [available for download](#).
